

## **Estimation of the number of KhAD-WAD 1F cases in The Netherlands**

**J. Brouwer, May 2026**

It is very difficult to find a reliable estimate of the number of KhAD-WAD 1F cases in the Netherlands. Bolhuis & Van Wijk (2015) analysed 884 Dutch 1F cases from 2000-2010. Of the 745 1F accusations then still standing, 448 involved Afghans. Based on a sample, they estimated that 72 per cent of those cases involved former KhAD and WAD personnel. Those 72 per cent out of 448 cases would mean there were 323 KhAD-WAD 1F cases in the Netherlands in the period 2000-2010.
